

Navigating to known coordinates

Each of the locations listed below is marked with flagging tape. Written on the flagging tape is the number and name associated with the location.

When you locate the flagging tape, check the number, and write down the name, to verify that you were there.

Example Flagging Tape: 0000 Sparrow

The location 2001 has not been saved into your GPS. You will need to enter it as a new waypoint. On the class eTrex GPS receivers, the other locations have been preloaded.

Use the GOTO feature of the GPS to navigate to each of the locations.

Hints:

- Plot these locations on the Google Satellite Photo before you try to locate them.
- The list order is not necessarily the best order to visit the locations, use your map.
- In many cases your mark on the map will be more useful for navigating than the GPS receiver. Use both methods.
- Double check to make sure your GPS is set to UTM, NAD27 CONUS

Format:	UTM	Datum:	NAD27 CONUS		
Numb	Zone	Zone	Easting	Northing	
2001	10	S	0588122	4124647	
2002	10	S	0587899	4124419	
2003	10	S	0587625	4124738	
2004	10	S	0588111	4124433	
2005	10	S	0587962	4124260	
2006	10	S	0587702	4124026	
2007	10	S	0588165	4124661	
2008	10	S	0587715	4124162
